

In re Patent Application of:
CHAPMAN ET AL.
Serial No. **09/596,629**
Filing Date: **June 19, 2000**

In the Claims:

1. (Currently Amended) A method for distributing an invention disclosure over an intranet, the method comprising the steps of:

creating and submitting an invention disclosure over the intranet, the invention disclosure including information about an invention and being submitted by an inventor to at least one evaluator via e-mail with a hyperlink to the invention disclosure; and

transmitting evaluation comments of the invention disclosure by the at least one evaluator via e-mail;

creating the invention disclosure comprising including an attachment therewith, the attachment having been created separate from the invention disclosure and including a portion of the information about the invention.

2. (Original) A method according to Claim 1, wherein the intranet includes a plurality of users enrolled therein with each user having associated personnel information stored within the intranet, the method further comprising the steps of:

creating a profile of the invention disclosure based upon a technical area relating to the invention disclosure in response to accessing associated personnel information of the inventor; and

transmitting a first notification message via e-mail to a first group of users based upon the created profile, the first group of users being within the plurality of users and including a technical review coordinator, the first notification message having a hyperlink to the invention

In re Patent Application of:

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

disclosure.

3. (Original) A method according to Claim 2, wherein the at least one evaluator is selected by the technical review coordinator.

4. (Original) A method according to Claim 3, further comprising the steps of:

submitting a recommendation of the invention disclosure by the technical review coordinator based upon the evaluation comments; and

transmitting the recommendation of the invention disclosure via e-mail to the first group of users.

5. (Original) A method according to Claim 2, wherein the step of transmitting the first notification message is responsive to submission of the invention disclosure.

6. (Original) A method according to Claim 2, wherein the profile comprises a functional manager of the inventor, a patent attorney, a technical review person, and a contracts person if the invention was developed under government funds.

7. (Original) A method according to Claim 6, wherein the profile further comprises information relating to the inventor including the inventor's employee number, department number, building number, phone number and e-mail address.

8. (Original) A method according to Claim 2, wherein the first group of users comprises a technical review

In re Patent Application of:

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

coordinator, a contract administrator if the invention was developed under government funds, and an intellectual property administrator.

9. (Original) A method according to Claim 8, wherein the first group of users further comprises a business area manager, a supervisor of the inventor, and the inventor.

Claim 10 (Cancelled).

11. (Original) A method according to Claim 1, wherein the step of creating comprises sending a notification message to a co-inventor, the notification message being transmitted via e-mail with a hyperlink to the invention disclosure.

12. (Currently Amended) A method for distributing an invention disclosure over an intranet, the intranet having a plurality of users enrolled therein with each user having associated personnel information stored within the intranet, the method comprising the steps of:

creating and submitting an invention disclosure over the intranet, the invention disclosure including information about an invention and being submitted by an inventor;

creating a profile of the invention disclosure based upon a technical area relating to the invention disclosure in response to accessing associated personnel information of the inventor;

transmitting a first notification message via e-mail to a first group of users based upon the created profile, the

In re Patent Application of:

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

first group of users being within the plurality of users and including a technical review coordinator, the first notification message having a hyperlink to the invention disclosure;

selecting at least one evaluator by the technical review coordinator;

transmitting a second notification message via e-mail to the at least one evaluator, the second notification message having a hyperlink to the invention disclosure;

submitting evaluation comments by the at least one evaluator;

submitting a recommendation of the invention disclosure by the technical review coordinator based upon the evaluation comments; and

transmitting the recommendation of the invention disclosure via e-mail to the first group of users;

creating the invention disclosure comprising including an attachment therewith, the attachment having been created separate from the invention disclosure and including a portion of the information about the invention.

13. (Original) A method according to Claim 12, further comprising the steps of:

transmitting a third notification message via e-mail to a second group of users based upon the created profile, the second group of users being within the plurality of users; and

transmitting the recommendation of the invention disclosure via e-mail to the second group of users.

14. (Original) A method according to Claim 13,

In re Patent Application of:
CHAPMAN ET AL.
Serial No. **09/596,629**
Filing Date: **June 19, 2000**

wherein the step of transmitting the third notification message is responsive to submission of the invention disclosure.

15. (Original) A method according to Claim 13, wherein the second group of users comprises a business area manager, a supervisor of the inventor, and the inventor.

16. (Original) A method according to Claim 12, wherein the step of transmitting the first notification message is responsive to submission of the invention disclosure.

17. (Original) A method according to Claim 12, wherein the profile comprises a functional manager of the inventor, a patent attorney, a technical review person, and a contracts person if the invention was developed under government funds.

18. (Original) A method according to Claim 17, wherein the profile further comprises information relating to the inventor including the inventor's employee number, department number, building number, phone number and e-mail address.

19. (Original) A method according to Claim 12, wherein the first group of users comprises a technical review coordinator, a contract administrator if the invention was developed under government funds, and an intellectual property administrator.

In re Patent Application of:
CHAPMAN ET AL.
Serial No. **09/596,629**
Filing Date: **June 19, 2000**

Claim 20 (Cancelled).

21. (Original) A method according to Claim 12, wherein the step of creating comprises sending a notification message to a co-inventor, the notification message being transmitted via e-mail with a hyperlink to the invention disclosure.

22. (Currently Amended) A method for distributing an invention disclosure over an intranet, the intranet having a plurality of users enrolled therein with each user having associated personnel information stored within the intranet, the method comprising the steps of:

creating and submitting an invention disclosure over the intranet, the invention disclosure including information about an invention and being submitted by an inventor;

creating a profile of the invention disclosure based upon a technical area relating to the invention disclosure in response to accessing associated personnel information of the inventor;

transmitting a first notification message via e-mail to a first group of users based upon the created profile, the first group of users being within the plurality of users;

transmitting a second notification message via e-mail to a second group of users based upon the created profile, the second group of users being within the plurality of users and including a technical review coordinator, the second notification message having a hyperlink to the invention disclosure;

In re Patent Application of:
CHAPMAN ET AL.
Serial No. **09/596,629**
Filing Date: **June 19, 2000**

selecting at least one evaluator by the technical review coordinator;

transmitting a third notification message via e-mail to the at least one evaluator, the third notification message having a hyperlink to the invention disclosure;

submitting evaluation comments by the at least one evaluator;

submitting a recommendation of the invention disclosure by the technical review coordinator based upon the evaluation comments; and

transmitting the recommendation of the invention disclosure via e-mail to the first and second group of users;

creating the invention disclosure comprising including an attachment therewith, the attachment having been created separate from the invention disclosure and including a portion of the information about the invention.

23. (Original) A method according to Claim 22, wherein the step of transmitting the first notification message is responsive to submission of the invention disclosure.

24. (Original) A method according to Claim 22, wherein the step of transmitting the second notification message is responsive to submission of the invention disclosure.

25. (Original) A method according to Claim 22, wherein the profile comprises a functional manager of the inventor, a patent attorney, a technical review person, and a

In re Patent Application of:

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

contracts person if the invention was developed under government funds.

26. (Original) A method according to Claim 25, wherein the profile further comprises information relating to the inventor including the inventor's employee number, department number, building number, phone number and e-mail address.

27. (Original) A method according to Claim 22, wherein the first group of users comprises a business area manager, a supervisor of the inventor, and the inventor.

28. (Original) A method according to Claim 22, wherein the second group of users comprises a technical review coordinator, a contract administrator if the invention was developed under government funds, and an intellectual property administrator.

Claim 29 (Cancelled).

30. (Original) A method according to Claim 22, wherein the step of creating comprises sending a notification message to a co-inventor, the notification message being transmitted via e-mail with a hyperlink to the invention disclosure.

31. (Currently Amended) An intranet for distributing an invention disclosure comprising:

at least one computing device comprising a plurality

In re Patent Application of:
CHAPMAN ET AL.
Serial No. 09/596,629
Filing Date: June 19, 2000

of software modules, said plurality of software modules
comprising

a first software module for creating and
submitting an invention disclosure over the
intranet, the invention disclosure including
information about an invention and being submitted
by an inventor to at least one evaluator via e-mail
with a hyperlink to the invention disclosure; and

a second software module for transmitting
evaluation comments of the invention disclosure by
the at least one evaluator via e-mail;

the first software module comprising
instructions for including an attachment to the
invention disclosure, the attachment having been
created separate from the invention disclosure and
including a portion of the information about the
invention.

32. (Currently Amended) An intranet according to
Claim 31, wherein the intranet includes a plurality of users
enrolled therein with each user having associated personnel
information stored within the intranet, ~~the intranet~~ further
comprising:

a third software module for creating a profile of
the invention disclosure based upon a technical area relating
to the invention disclosure in response to accessing
associated personnel information of the inventor; and

a fourth software module for transmitting a first
notification message via e-mail to a first group of users
based upon the created profile, the first group of users being

In re Patent Application of:
CHAPMAN ET AL.
Serial No. 09/596,629
Filing Date: June 19, 2000

within the plurality of users and including a technical review coordinator, the first notification message having a hyperlink to the invention disclosure.

33. (Original) An intranet according to Claim 32, wherein the at least one evaluator is selected by the technical review coordinator.

34. (Original) An intranet according to Claim 33, further comprising:

a fifth software module for submitting a recommendation of the invention disclosure by the technical review coordinator based upon the evaluation comments; and

a sixth software module for transmitting the recommendation of the invention disclosure via e-mail to the first group of users.

35. (Original) An intranet according to Claim 32, wherein the fourth software module for transmitting the first notification message is responsive to submission of the invention disclosure.

36. (Original) An intranet according to Claim 32, wherein the profile comprises a functional manager of the inventor, a patent attorney, a technical review person, and a contracts person if the invention was developed under government funds.

37. (Original) An intranet according to Claim 36, wherein the profile further comprises information relating to

In re Patent Application of:
CHAPMAN ET AL.
Serial No. 09/596,629
Filing Date: June 19, 2000

the inventor including the inventor's employee number, department number, building number, phone number and e-mail address.

38. (Original) An intranet according to Claim 32, wherein the first group of users comprises a technical review coordinator, a contract administrator if the invention was developed under government funds, and an intellectual property administrator.

39. (Original) An intranet according to Claim 38, wherein the first group of users further comprises a business area manager, a supervisor of the inventor, and the inventor.

Claim 40 (Cancelled).

41. (Original) An intranet according to Claim 31, wherein the first software module comprises instructions for sending a notification message to a co-inventor, the notification message being transmitted via e-mail with a hyperlink to the invention disclosure.

42. (Currently Amended) An intranet for distributing an invention disclosure, the intranet having a plurality of users enrolled therein with each user having associated personnel information stored within the intranet, the intranet comprising:

at least one computing device comprising a plurality of software modules, said plurality of software modules comprising

In re Patent Application of:

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

a first software module for creating and submitting an invention disclosure over the intranet, the invention disclosure including information about an invention and being submitted by an inventor;

a second software module for creating a profile of the invention disclosure based upon a technical area relating to the invention disclosure in response to accessing associated personnel information of the inventor;

a third software module for transmitting a first notification message via e-mail to a first group of users based upon the created profile, the first group of users being within the plurality of users and including a technical review coordinator, the first notification message having a hyperlink to the invention disclosure;

a fourth software module for selecting at least one evaluator by the technical review coordinator;

a fifth software module for transmitting a second notification message via e-mail to the at least one evaluator, the second notification message having a hyperlink to the invention disclosure;

a sixth software module for submitting evaluation comments by the at least one evaluator;

a seventh software module for submitting a recommendation of the invention disclosure by the technical review coordinator based upon the evaluation comments; and

an eighth software module for transmitting the

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

recommendation of the invention disclosure via e-mail to the first group of users;

the first software module comprising instructions for including an attachment to the invention disclosure, the attachment having been created separate from the invention disclosure and including a portion of the information about the invention.

43. (Original) An intranet according to Claim 42, further comprising:

a ninth software module for transmitting a third notification message via e-mail to a second group of users based upon the created profile, the second group of users being within the plurality of users; and

wherein the eighth software module further transmits the recommendation of the invention disclosure via e-mail to the second group of users.

44. (Original) An intranet according to Claim 43, wherein the ninth software module for transmitting the third notification message is responsive to submission of the invention disclosure.

45. (Original) An intranet according to Claim 43, wherein the second group of users comprises a business area manager, a supervisor of the inventor, and the inventor.

46. (Original) An intranet according to Claim 42, wherein the third software module for transmitting the first

_____ /

notification message is responsive to submission of the invention disclosure.

47. (Original) An intranet according to Claim 42, wherein the profile comprises a functional manager of the inventor, a patent attorney, a technical review person, and a contracts person if the invention was developed under government funds.

48. (Original) An intranet according to Claim 47, wherein the profile further comprises information relating to the inventor including the inventor's employee number, department number, building number, phone number and e-mail address.

49. (Original) An intranet according to Claim 42, wherein the first group of users comprises a technical review coordinator, a contract administrator if the invention was developed under government funds, and an intellectual property administrator.

Claim 50 (Cancelled).

51. (Original) An intranet according to Claim 42, wherein the first software module further comprises instructions for sending a notification message to a co-inventor, the notification message being transmitted via e-mail with a hyperlink to the invention disclosure.

52. (Currently Amended) An intranet for distributing

In re Patent Application of:
CHAPMAN ET AL.
Serial No. 09/596,629
Filing Date: June 19, 2000

an invention disclosure, the intranet having a plurality of users enrolled therein, each of the plurality of users having associated personnel information stored within the intranet, the intranet comprising:

at least one computing device comprising a plurality of software modules, said plurality of software modules comprising

a first software module for creating and submitting an invention disclosure over the intranet, the invention disclosure including information about an invention and being submitted by an inventor;

a second software module for creating a profile of the invention disclosure based upon a technical area relating to the invention disclosure in response to accessing associated personnel information of the inventor;

a third software module for transmitting a first notification message via e-mail to a first group of users based upon the created profile, the first group of users being within the plurality of users;

a fourth software module for transmitting a second notification message via e-mail to a second group of users based upon the created profile, the second group of users being within the plurality of users and including a technical review coordinator, the second notification message having a hyperlink to the invention disclosure;

a fifth software module for selecting at least

invention disclosure.

61. (Currently Amended) A computer-readable medium having stored thereon a data structure, comprising:

a first data field containing data representing an invention disclosure created by an inventor, the invention disclosure to include information about an invention and to be submitted over an intranet;

a second data field containing data representing an e-mail message having a hyperlink to the data representing the invention disclosure, the e-mail message to be transmitted to at least one evaluator; and

a third data field containing data representing comments of the at least one evaluator, the comments to be transmitted via e-mail;

a fourth data field containing data representing an attachment to be included with the invention disclosure, the attachment having been created separate from the invention disclosure and including a portion of the information about the invention.

62. (Original) A computer-readable medium according to Claim 61, wherein the intranet includes a plurality of users enrolled therein with each user having associated personnel information stored within the intranet, the computer-readable medium further comprising:

a fourth data field containing data representing a profile of the invention disclosure, the profile being based upon a technical area relating to the invention disclosure in response to accessing associated personnel information of the

Filing Date: **June 19, 2000**

inventor; and

a fifth data field containing data representing a first notification message to be transmitted via e-mail to a first group of users based upon the created profile, the first group of users being within the plurality of users and including a technical review coordinator, the first notification message having a hyperlink to the invention disclosure.

63. (Original) A computer-readable medium according to Claim 62, further comprising a sixth data field containing data representing selection of the at least one evaluator by the technical review coordinator.

64. (Original) A computer-readable medium according to Claim 63, further comprising:

a seventh data field containing data representing a recommendation of the invention disclosure submitted by the technical review coordinator based upon the evaluation comments; and

an eighth data field containing data representing an e-mail message of the recommendation of the invention disclosure to be transmitted to the first group of users.

65. (Original) A computer-readable medium according to Claim 62, wherein the fourth data field containing data representing the profile comprises data representing a functional manager of the inventor, a patent attorney, a technical review person, and a contracts person if the invention was developed under government funds.

In re Patent Application of:

CHAPMAN ET AL.

Serial No. **09/596,629**

Filing Date: **June 19, 2000**

66. (Original) A computer-readable medium according to Claim 65, wherein the fourth data field further comprises data representing information relating to the inventor including the inventor's employee number, department number, building number, phone number and e-mail address.

67. (Original) A computer-readable medium according to Claim 62, wherein the fifth data field containing data representing the first group of users further comprises data representing a technical review coordinator, a contract administrator if the invention was developed under government funds, and an intellectual property administrator.

68. (Original) A computer-readable medium according to Claim 67, wherein the fifth data field further comprises data representing a business area manager, a supervisor of the inventor, and the inventor.

Claim 69 (Cancelled).

70. (Original) A computer-readable medium according to Claim 61, further comprising a fourth data field containing data representing a notification message to be transmitted to a co-inventor, the notification message to be transmitted via e-mail with a hyperlink to the invention disclosure.
